Product Introduction 产品介绍

Astron LED Spotlight Premium is the best replacement for existing Halogen bulbs. Equipped with Sharp LED chipset and quality driver, it gives a strong assurance to a long life span, consistent colour tone and low light decay for the luminaire. The diamond chrome reflector in the LED spotlight provides a wide beam angle with uniform brightness. The fitted anti-glare lens maintains similar lux level while minimizing the glare to user's eyes. The aesthetically crafted exterior further enhances the quality of space. For a similar brightness to a 50w Halogen bulb, one can consider our 4w-6w Astron LED spotlight premium. This is highly adopted as the best choice for high end commercial spaces like hotels, display lightings for mall, retail shops and homes.

Features 产品特点

- Strong assurance on lifespan, A Reliable, Durable and Safe luminaire;
- Uniform lighting effect and colour with wide angle coverage; adjustable with easy to replace lens;
- The useful life can be 30,000 hours; Lifespan is 25 times longer than Halogen bulbs
- Similar brightness at 1/10 the electricity consumption as compared to Halogen bulbs
- Strong heat dissipation with advanced heat sink design and high grade aluminium material used
