Product Introduction 产品介绍

Elektra™ Adjustable Downlight is a premium chip on board spotlight with an aesthetically crafted holder. The casing allows the spotlight to be tilted at an angle to emphasis on an object or a specific area. The diamond chrome reflector enhances the overall light spread with the least energy required. It uses high quality LED chipset and driver, thus assuring a long lasting luminaire. This is certainly a perfect spotlight for hotels, offices, retail outlets, restaurants and interior designed homes as it blends well with the ceiling and environment.

Features 产品特点

- Professional Optical Design, angle of light varies according to user's requirements;
- Chip on board for ease of installation and blending in to environment;
- The useful life can be 20,000 hours; Lifespan is 10 times longer than CFL;
- Strong heat dissipation achieved with advanced high grade aluminium sink design.
