## Product Introduction 产品介绍

Elektra Circular tubelight ('ECT') is a high quality LED lamp with an aesthetically crafted exterior. It is equipped with a safe isolated Rubycon driver from Japan to achieve maximum durability. It is extremely easy to install in 2 steps and fits the common lamp holders and fixtures. The 18w or 22w Elektra™ Circular tube replaces conventional fluorescent of 32w or 40w to achieve at least 50% cost savings in electricity usage. The high quality Taiwan Epistar 5730 LED chipset and Rubycon's driver used will provide a strong assurance for a great user experience in homes and the commercial spaces.

## Features 产品特点

- Professional Optical Design, no visible dark spots on lamp, smooth and comfortable light effect;
- High CRI, which is close to natural light;
- Extremely easy to install in just 2 steps and fits most holders;
- Equipped with Japan's Rubycon driver and Epistar 5730 LED chipset for maximum lifespan;
- The useful life can be 30,000 hours; Lifespan is 15 times longer than CFL.
- Strong heat dissipation achieved with advanced heat sink design.
