## Product Introduction 产品介绍

Phos LED Floodlight is a high quality LED floodlight with an aesthetic exterior. Using high quality CREE LED chip set and driver, the LED floodlight is a reliable light fixture for many infrastructures. The specially crafted lens and reflector creates a smooth lighting effect that meets most lighting requirements of both outdoor and indoor sites. The floodlight replaces conventional sodium halide lamps and is installed widely in commercial projects. That includes security lighting, carpark lighting, parks and multi-purpose halls. With the housing being aluminium die casted, the LED floodlight is also able to withstand the demands of the changing weather.

## Features 产品特点

- Professional Optical Design, High Brightness, smooth and comfortable light effect
- High CRI, which is close to natural light
- Quality LED chipset and driver for greater assurance of light quality and lifespan.
- The useful life can be 20,000 hours; Lifespan is 10 times longer than CFL
- Strong heat dissipation achieved with advanced heat sink design and high grade aluminium material used
